Summits on the Air – ARM for USA W6

Change Control

Date	Version	Details	By
01-Jun-2009	1.0	First formal issue of this document.	Stuart Schreiber, KI6J
01-Aug-2012	2.0	<p>1) Added 3,510 new summits that are listed with a prominence of 500 feet at both ListsOfJohn.com and PeakList.org. Added several new overlay regions to accommodate them.</p> <p>2) Corrected coordinate errors for several existing summits (W6/CC-063, W6/CC-072, W6/CC-073, W6/CD-015, W6/CD-019, W6/CN-016, W6/CN-017, W6/CN-023, W6/CN-025, W6/SN-003, W6/SN-026, W6/SN-046 and W6/SN-048), corrected the elevation of one summit (W6/CN-017) and clarified or corrected the names of two existing summits (W6/CC-073 and W6/CN-017).</p> <p>3) Removed W6/CC-067 (Oyster Point) from the active summit listing by setting its Valid Until date to 7/31/2012. This was done because investigation showed that its prominence is less than 500 feet.</p> <p>4) Removed requirement that new summits have demonstrable public access. Rewrote the “Disclaimer” and “Rights of way and access issues” sections to add additional information reinforcing that it is solely the activator’s responsibility to secure legal access to a summit and its approaches.</p> <p>5) Removed the process to delete a summit because of a permanent lack of public access.</p> <p>6) Incorporated the “Manager note” into a new section called History of Summit Listings and Regions.</p> <p>7) Made various other changes to improve content and formatting.</p>	<p>Adrian van der Riet N6ZA</p> <p>Eric June KU6J</p> <p>Guy Hamblen N7UN</p> <p>Walter Underwood K6WRU</p> <p>Fred Jensen K6DGW</p> <p>Todd Remington KH2TJ</p> <p>Richard Hill NU6T</p>
01-Jan-2013	2.1	Removal of duplicate summit W6/ND-186.	Adrian van der Riet N6ZA
31-Mar-2016	3.0	Added Paul Gacek W6PNG as Association Manager (AM)	Guy Hamblen N7UN
1-May-2016	3.1	<p>1) Changed to P150m (492 ft) prominence threshold and an Activation Zone of 25m (82 ft).</p> <p>2) Added 569 all time new summits based on updated LofJ datasets (Jan 2016 download).</p> <p>3) Add Prominence and Saddle Lat/Long data fields to Summit Lists</p>	<p>Clayton Nall NF1R</p> <p>Walt Underwood K6WRU</p> <p>Fred Jensen K6DGW</p> <p>Hal Rounds N6JZT</p> <p>Elliott Pisor K6EL</p> <p>Paul Gacek, W6PNG</p>

Summits on the Air – ARM for USA W6

		4) Updated Lat/Longs on 189 peaks based on 2016 LofJ dataset. 5) Deactivated 40 summits due to change out of AZ. Assigned a new Ref Nr to the same peak in the new location. 6) Updated Elevations on 70 existing peaks based on 2016 LofJ dataset.	Guy Hamblen, N7UN
1-Jan-2019	3.2	1) Added Rex Vokey KE6MT as Association Manager (AM) and Jamie Dahl N6JFD as Assistant AM. 2) Updated reference data, including update of Regional Managers (RMs). 3) Additional info in section 1.6 – Safety Considerations	Rex Vokey KE6MT Jamie Dahl N6JFD
1-Dec-2020	3.3	1) Bring back summit NS-038 2) Correct spelling of summit CT-147 3) Correct number of points for SC-422 4) New RM for SC region 5) Extend winter bonus	Rex Vokey KE6MT Jamie Dahl N6JFD

Disclaimer

Hiking and mountain climbing are potentially hazardous activities particularly in California with its extreme elevations, considerable climb exposures and quick weather changes. Activators take part in the Program entirely at their own risk, and the Program and its volunteers in their entirety shall accept no responsibility for injury, loss of life or any other loss. Activators are reminded that hill climbing is an inherently hazardous activity. Accidents can and do happen in the mountains and the risk is neither increased nor mitigated by the SOTA Program.

The inclusion of a summit in this Reference Manual does not indicate that it is safe, legal or even possible to climb to the summit. The Summit Reference data is not guaranteed to be accurate and sole reliance should not be placed upon it. All participants must be sure to check applicable local, state, and federal laws to be sure that a hike or climb up to any of the summits listed in this manual is legal and safe. Some summits may reside in private hands and all activators must respect private property rights. Other summits are located on restricted government owned land (e.g. military bases, gunnery ranges and bombing ranges) where trespass is not only illegal but could result in death. Under no circumstances should a summit be activated without the requisite permissions. Participation in the SOTA Awards program is at your own risk.

Some California mountains are technically very demanding and require considerable traditional climbing experience, rope climbing skills and competent knowledge of route selection and the associated risks. Mountain climbing in California can be a dangerous sport as the numerous climbing deaths in the National Parks attest. Technical climbing competency is a requirement for some peaks as some routes are technically graded 5.10 or greater based on the Yosemite Decimal System. Many routes offer poor protection with long run outs where a fall could result in serious injury or death.

Proper training, experience, and personal capability assessment is required. Skills-based training is readily available from many world-recognized climbing groups including the [Mazamas](#) and [The Mountaineers](#). Do not become a statistic!

Summits on the Air – ARM for USA W6

1.0 Association Reference Data

Association	USA(W6)	
Commencement date	01 July 2009	
Regions	W6 Regions:	Nr of Summits
	Coastal Ranges (CC-xxx)	76
	Desert Ranges (CD-xxx)	21
	Northern Ranges (CN-xxx)	28
	Transverse Ranges (CT-xxx)	281
	Central Valley (CV-xxx)	17
	Inyo Mountains (IN-xxx)	55
	Northern Coastal Ranges (NC-xxx)	543
	Northern Desert (ND-xxx)	401
	Northeastern Ranges (NE-xxx)	324
	Northern Sierra (NS-xxx)	429
	Northwestern Ranges (NW-xxx)	441
	Southern Coastal Ranges (SC-xxx)	460
	Southern Desert (SD-xxx)	529
	Sierra Nevada (SN-xxx)	52
	Southern Sierra (SS-xxx)	657
	White Mountains (WH-xxx)	14
	Total Summits:	4328
Association parameters	See General Rules for parameter definitions	
Summit operation criteria	Operation must be within 25 m (82 ft) vertically of the summit	

Band 1, score 1 point	<2,500ft.ASL (770 Summits)
Band 2, score 2 points	>=2,500ft.ASL <4,000ft. ASL (980 Summits)
Band 3, score 4 points	>=4,000ft.ASL <5,500ft. ASL. (737 Summits)
Band 4, score 6 points	>=5,500ft.ASL <7,500ft. ASL (811 Summits)
Band 5, score 8 points	>=7,500ft ASL <11,000ft.ASL (642 Summits)
Band 6, score 10 points	>=11,000ft.ASL (350 Summits)

Seasonal bonus	Yes
Bonus rationale	<p>Winter period with highest probability of localized unpredictable weather impeding travel and low temperatures. Applicable to summits in regions CN, NE, NW, SN, NS, SS, WH, IN and CT.</p> <p>Summer period requiring substantial preparation to safeguard expedition from life-threatening daytime high temperatures. Applicable to summits in regions CD, ND and SD.</p>

Summits on the Air – ARM for USA W6

Min. height for bonus	Winter bonus - 3 Points for activations $\geq 6,500$ ft. ASL Summer bonus - 3 Points for all activations in Region
Bonus period dates	Wintertime Bonus - 1 December to 31 March inclusive Summertime Bonus - 15 June to 15 September inclusive
Association sponsored awards	Bighorn Ram, awarded to activators at the 500 point level for W6 activations. Golden Eagle, awarded to chasers and SWLs at the 500 point level for W6 chases.
Association Manager	Rex Vokey (rex@ke6mt.us)
Assistant Association Manager	Jamie Dahl (jfdahl@gmail.com)

1.1 Program Derivation

The W6 SOTA awards program is based upon and conducted in accordance with the generalized SOTA program originating in the United Kingdom.

Participants in the W6 SOTA program must meet the qualifications stated in the SOTA General Rules, and must participate in accordance with these rules. In cases where information in this reference document is in conflict with the General Rules, the General Rules shall take precedence. The full text of the SOTA General Rules can be found at <http://www.sota.org.uk/Joining-In/General-Rules>.

Summits are qualified for inclusion in the W6 SOTA program on the basis of [topographic prominence](#) which requires a minimum of 150 meters (492 feet) of vertical rise “above the lowest contour line encircling it and no higher summit”¹ in order to qualify. Summit scoring is based upon the summit’s height above sea level.

1.2 General Information

All participants (activators and chasers) in the SOTA Program must have an amateur radio license from the FCC or similar authority of other countries.

The W6 SOTA dataset was derived from the USGS [NED](#) database. This dataset contains both named and un-named mountains (where the number is the elevation in feet) which meet the prominence requirements of SOTA. The goal of this ARM is to publish a list of SOTA-qualifying summits for the W6 Association. The W6 Association has 4,285 qualified summits.

1.3 Final Access, Activation Zone, and Operating Location Explained

The SOTA General Rules state that the method of final access to the radio operating location must be non-motorized. The General Rules do not specify the distance, either vertical or horizontal, that this final access must cover.²

¹ See [Wikipedia](#) for a discussion.

² See SOTA General Rules 1.20, Section 3.7.1.3 (30 Mar 2015)

Summits on the Air – ARM for USA W6

Operations must not be in, or in the close vicinity of a motor vehicle, cannot use a permanent electrical power source, nor use a fossil fuel generator in any fashion. No part of the station may be connected in any way with the motor vehicle. All equipment must be operated from portable power source (batteries, solar cells, etc.).

The SOTA General Rules also state that radio operations must take place within a summit's Activation Zone which, in the case of the W6 association, is an area within 25 vertical meters (82 feet) of the actual physical summit point. The Activation Zone is a single "unbroken" area that can be visualized by drawing a closed shape on a map following a contour line 25 meters (82 feet) below the summit point. The operating position must be within this zone, but antennas may extend well beyond.

Activators should feel free to contact the Association Manager should further clarification be deemed necessary or if any doubt exists in an activator's mind as to whether their activation will be valid for SOTA credit.

1.4 Rights of Way and Access Issues

Many W6 SOTA summits are located on public land but many others are not. **Any activator must be sure to check applicable local, state and federal laws to be sure that a hike or climb up to any of the summits listed in this manual is legal and safe. Some summits may reside in private hands and all activators must respect private property rights. Other summits are located on restricted government owned land (e.g. military bases, gunnery ranges and bombing ranges) where trespass is not only illegal but could literally result in one's death. Under no circumstances should a summit be activated without the requisite permissions.**

National forests comprise the majority of California public land. All California national forests are part of the forest service's [Pacific Southwest Region, otherwise known as Region 5](#).

As a particular caution to European hikers, please note that "everyman's right", "freedom to roam", or "right of way" does not exist in the USA. Permission to cross private lands must be expressly granted and cannot be assumed.

California National Forests (source: Forest Service Website)

Motorized vehicle use is limited to designated routes in all national forests but cross-country travel by foot is generally permitted. If you plan to use forest service roads to access a trailhead, obtain a Motor Vehicle Use Map (MVUM) from the particular national forest so as to assure that your planned route is legal for the type of vehicle that you intend to use (some routes are only designated for motorcycle use, vehicles 50" wide or less, etc.). Note that a MVUM is **not** the same as the less detailed and more generally available national forest map. You should also review the current forest orders for the forest and area of interest. Forest orders may implement temporary closures of areas or impose special rules for access. These maps and forest orders are available at the national forest's ranger stations and administrative offices and are sometimes also available online.

You may also wish to contact the national forest ranger station within the area of your summit to be sure you will not face any locked gates or maintenance road closures. Gate keys can usually be checked out for use at the forest office or ranger station. Many heavy use areas have restrictions on camping, vehicle access and trail use. In these cases, a permit is usually required and easily obtained. In the cases of extremely heavy use these permits are issued by reservation or lottery.

Summits on the Air – ARM for USA W6

Bureau of Land Management (BLM) lands comprise the next most significant portion of public land. BLM lands have access and usage restrictions similar to national forests (e.g. restrictions on motor vehicle use). BLM lands are often leased to commercial interests such as mining, timber cutting and cattle grazing. Despite some postings to the contrary, these interests must allow public right of way access on leased land. However, the equipment, improvements and livestock are private property and must not be disturbed. Do not challenge “No Trespassing” signage.

State Parks, National Parks and nature preserves are usually quite restrictive concerning use. Use only designated parking to access designated trails for travel to designated locations. Obtain all necessary entrance, hiking and camping permits.

Some large corporate landholders such as timber, utility and oil companies, do allow public use of their land. Some will issue a permit in exchange for a signed waiver of liability. Others allow open access. Always follow posted terms of use.

Do not trespass on Native American land or US Military land.

If an activator does manage to receive permission from a private landowner to activate a private summit, the activator must remember he may be the landowner’s only contact with SOTA or amateur radio and the activator must adhere to the highest standards of politeness and professionalism for this activation so as to pave the way for future activators to be authorized. All activators must adhere to the outdoor ethic of “[Leave No Trace](#)”.

Activators are strongly urged to post comments regarding access, trails and other information about a summit on the www.sota.org.uk website for the benefit of other activators. Navigate to the summit record and use the 'Add New Article' link. Respect intellectual property law when adding information to the SOTA website.

1.5 Maps and Navigation

A GPS receiver is not a substitute for maps of sufficient resolution and a compass as well as the ability to use them. A GPS device should be carried only as a secondary source of navigation information.

US Geological Survey (USGS) maps are considered the standard for backcountry travel. USGS topographic maps accurately represent the natural and manmade features of the land to stringent National Map Accuracy Standards.

USGS maps of the 7½ Minute Series (covering 7½ x 7½ minutes of geographic arc) show most maintained trails and contour intervals of 40 ft. at a scale of 1:24,000. Carrying these maps as a primary or backup source of navigation information is strongly recommended even if you are familiar with the terrain.

Also useful are US Forest Service, National Park and State Park maps showing parking, camping, toilet, trash and other visitor facilities. A Motor Vehicle Use Map (MVUM) is highly recommended if traveling via motor vehicle within a national forest. See the “Rights of way and access issues” section above for more information. USFS MVUM's can be downloaded [here](#).

California USGS maps are available from the USGS. See <https://answers.usgs.gov> for details.

The Grid reference system used in this ARM will be Latitude and Longitude expressed in [Decimal-Degrees](#). All Latitudes are positive, and all Longitudes are negative for the W6 ARM. This system has been chosen for its compatibility with [Google Maps](#). Potential activators and chasers need

Summits on the Air – ARM for USA W6

only enter a summit's decimal coordinates into Google Maps to see a topographic, satellite or road map of a summit or to find driving directions to the closest roads.

The Association Manager suggests that the potential activator conduct internet searches for the specific regions and summits he is interested in. Such internet searches may yield links to hiking, biking, and climbing groups that share intimate local knowledge of a summit, its access, and nearby resources.

1.6 Safety Considerations

The majority of W6 SOTA summits are relatively accessible by experience mountain hikers. However, mountaineering and backcountry hiking are inherently risky endeavors. While the risks you assume by participating in SOTA activities can never be dismissed, they can be greatly minimized through knowledge, preparation and experience. REI and the Sierra Club offer a number of outdoor hiking, map navigation, and emergency survival courses.

The "Ten Essentials" is a list of essential items hiking authorities deem necessary for safe travel in the backcountry. The Ten Essentials were first described in the 1930s by The Mountaineers, a Seattle-based organization for climbers and outdoor adventurers. Many regional organizations and authors recommend that hikers, backpackers, and climbers rigorously ensure they have the Ten Essentials with them. Carrying these basic items improves the chances that one is prepared for an unexpected emergency in the outdoors.

The Mountaineer's updated "systems" approach made its debut in the seventh edition of its seminal text on climbing and outdoor exploration, *Mountaineering: The Freedom of the Hills* (The Mountaineers Books, 2003):

Updated Ten Essential "Systems"

1. Navigation Systems (map, compass, GPS, etc.)
2. Sun protection (clothing, hats, sunglasses, skin protection creams)
3. Insulation (extra clothing)
4. Illumination (headlamps, LED flashlights, extra long-lasting batteries, solar panels)
5. First-aid supplies
6. Fire (matches, firestarters like Esbit tabs)
7. Repair kit and tools
8. Nutrition (extra food)
9. Hydration (extra water, purification capability)
10. Emergency shelter and signaling devices (mirrors, radios, Spot devices)

A bear can destroy your car for a morsel of food left inside. The sting of a scorpion can hospitalize you. The bite of a rattlesnake can be fatal in the backcountry. A mountain lion can track and attack you. Understanding the range and behavior of these animals and adapting your plans accordingly will greatly decrease your risk.

Mountain roads are often unstable and subject to temporary closure. The condition of access roads through forest, park or BLM lands should be confirmed by contacting the managing agency. Highway travel conditions can be checked by calling Caltrans at 1-800-427-7623 or by visiting its [website](#).

Mountain weather in California can vary from blazing heat to blowing snow at a single location in a single 12-hour period. Be prepared to travel and to stay for one unplanned day in any type of weather you may encounter. NOAA forecasts should be checked at <http://weather.noaa.gov/> before any travel commences. Current conditions and local hazardous weather warnings should be monitored on NOAA Weather Radio, with frequencies available at <http://www.nws.noaa.gov/nwr/coverage/stations.php?State=CA>.

Summits on the Air – ARM for USA W6

Spending time in the wilderness can be very rewarding. However the environment can be harsh and capricious. Heat dictates ample water, cold dictates ample clothing and strenuous exercise dictates food to recharge yourself. Make sure you have access to what you need in the middle of nowhere. Hiking alone represents a unique set of challenges and even with a team you could become separated, so having maps to navigate back to your ride home or camp site are essential. The wilderness can be a wonderful place, but rains can lead to unexpected floods, a sun-drenched trail can twist into an icy skate rink further along. Think Boy Scouts...Be Prepared!

The trail approaches to many W6 SOTA summits can be long and technical. Assess your skill and fitness levels realistically and travel well within your limitations. Remember, once you make the summit you are only half the way home. Often the down climb is where most accidents occur due to fatigue and lack of focus! "It's a round trip. Getting to the summit is optional, getting down is mandatory." *Ed Viesturs, first American to summit all 14 peaks over 8,000 meters.*

1.6.1 Fines for your own Rescue

Be aware that a 2015 California law allows for counties to recover search and rescue costs from individuals in some circumstances. See this [website](#) for details.

1.7 Environmental Considerations

FOLLOW ALL POSTED FIRE RESTRICTIONS OR YOU MAY END UP IN PRISON. This is not an exaggeration.

The public lands of California are subject to temporary use restrictions and area closures for reasons including burn area restoration, use impact recovery, threatened species habitat preservation and wildfire risk. Such changes to access are always advertised and well posted. Check with the administering agencies and never violate these restrictions.

1.8 Awards

The W6 SOTA association sponsors two awards. The Bighorn Ram Award is available to those activators who have accumulated 500 points activating W6 summits. The Golden Eagle Award is available to chasers and SWLs participating in the generalized program who have accumulated 500 points working W6 activations. All W6 SOTA awards are available from the Association Manager upon request.

1.9 Process to Maintain Summit Lists

If the reader finds a summit which he/she believes to meet the qualifications of the SOTA program, or if a mistake is found in the summit data, please contact the Association Manager. If an activator wishes to see a particular summit included in the W6 SOTA Association, please provide the Association Manager with the following information:

1. Name of summit as named on the USGS [Geonames](#) database.
2. The Latitude and Longitude of summit.
3. The elevation of the summit above sea level.
4. The summit's prominence value along with a citation of the source for this data.

The Association Manager will check whether the summit meets the qualification criteria and, if it does, will forward this information to the SOTA Management Team for inclusion in the SOTA database. The decisions of the Association Manager and the Management Team are final regarding the interpretation of

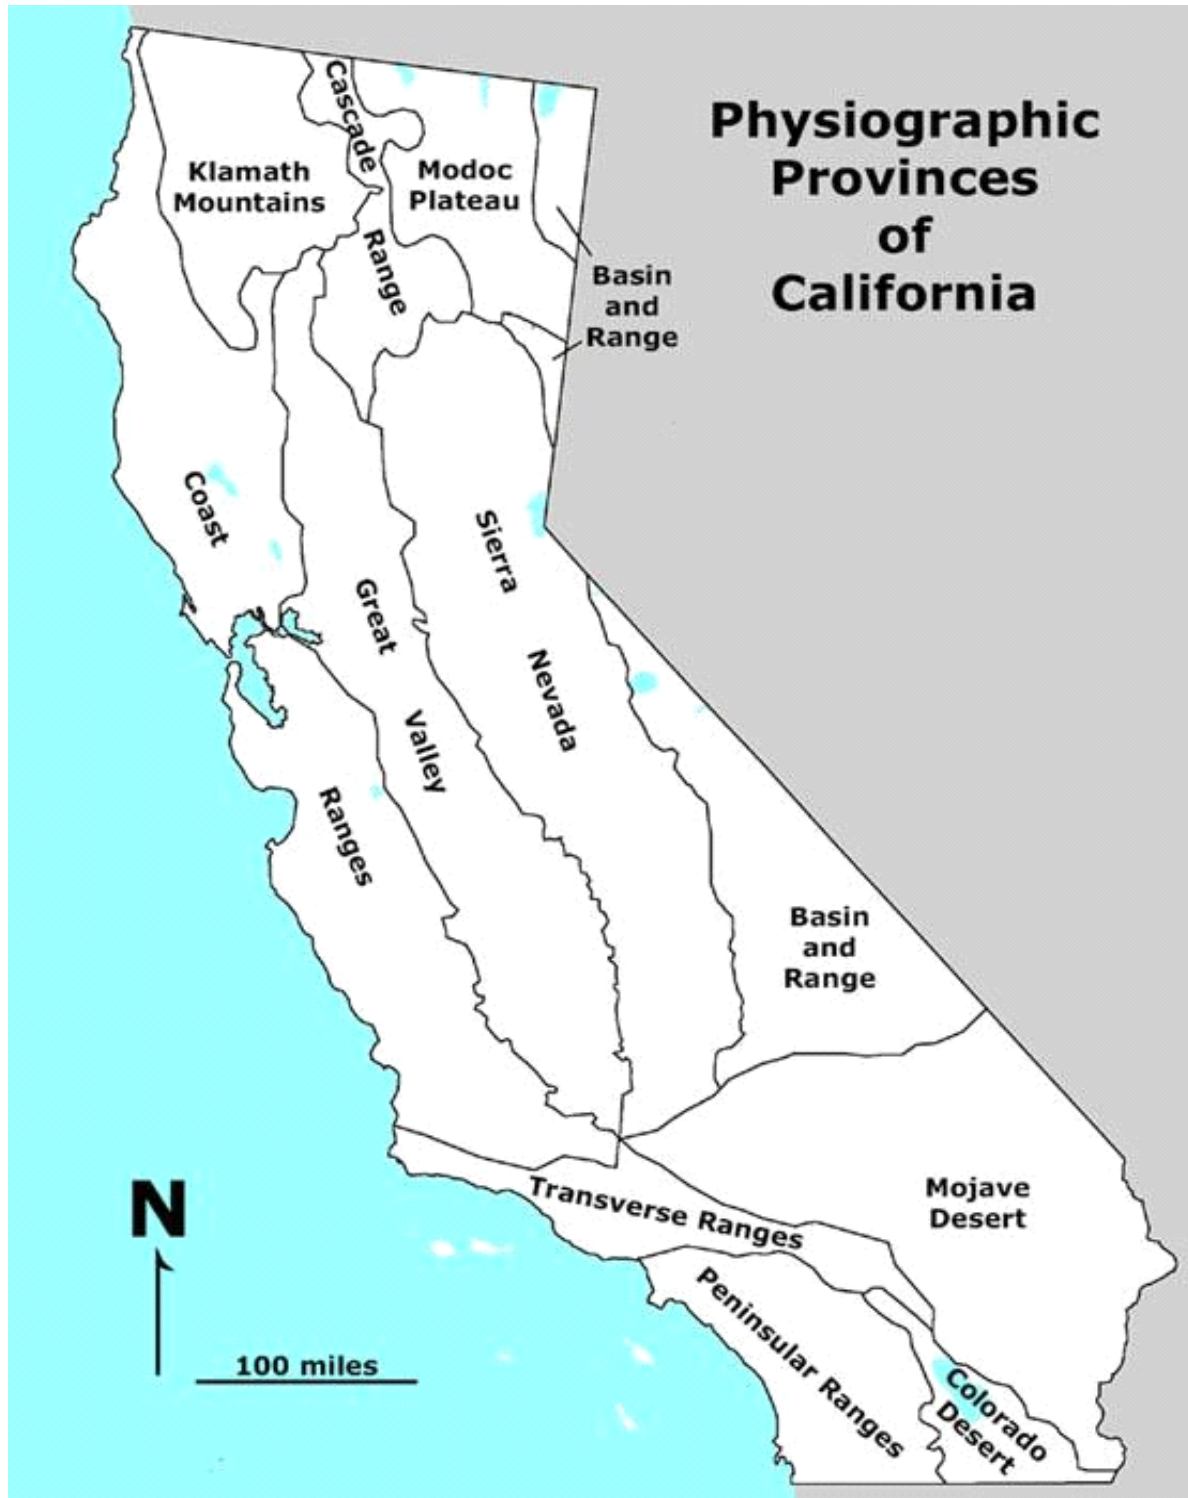

Summits on the Air – ARM for USA W6

the criteria and the inclusion or exclusion of a summit. Summits cannot be counted for points in the SOTA program until a reference number has been issued in the SOTA Summits database.

Petitions are to be reviewed and appropriate action taken at least once per calendar year.

2.0 Summit Reference Data

Geologic Areas Referenced in Regional Notes (source: USGS Website)

2.1 History of W6 Summit Listings and Regions

When the W6 association was created, five regions based on California's physiographic provinces were established: Northern Ranges, Coastal Ranges, Sierra Nevada, Transverse Ranges and Desert Ranges. For the association's first 208 summits, the height and prominence values listed were taken from the data maintained on the Peaklist.org website. These values, as well as documented names and locations, were cross checked with data maintained on the USGS Geonames database. In cases where discrepancies were less than 100 feet the Peaklist values were maintained. In cases where the discrepancy was greater, the appropriate value was chosen upon map examination. In all cases where the discrepancy put the summits' prominence qualification into question, the summits were disqualified. Decimal longitude and latitude values were taken from the USGS database.

In 2012, 3,510 new summits were added in version 2 of this document. These summits include all remaining California summits that are listed with a prominence of 500 feet or more at both ListsOfJohn.com and PeakList.org. This selection process provides a very high level of confidence that the summits meet both the association's minimum prominence requirement of 500 feet and meet all requirements stated in the SOTA General Rules. Whenever possible, these summits were position matched to entries in the USGS Geonames database and assigned the corresponding name from that database. Many summits have no name in the USGS Geonames database or on USGS topo maps. In these cases the name was chosen from the ListsOfJohn or PeakList data. Coordinates and elevations were taken from ListsOfJohn in most cases but occasionally from PeakList or the USGS Geonames database when topo map examination showed those values to be better. One summit, W6/CC-067 - Oyster Point, was removed from the active summit listing after investigation showed that its prominence is less than 500 feet.

Because of the large number of summits added in 2012 of this document, several new regions were established to ensure that the per-region summit count stayed below the SOTA database's limit of 999 summits, now and into the foreseeable future. These regions were overlaid over four of the five existing regions. One new region based on physiographic province was created (Central Valley) to accommodate new summits in that geographic area. The White Mountains and Inyo Mountains regions were created so as to allow their summits to have a different seasonal bonus period than the Desert Ranges.

In 2015, Eric June (SK), KU6J, was preparing an update of approximately 100 summits to be added to the summit lists of W6. A local team of W6 participants picked up that effort in early 2016. Based on a new summit list from ListsofJohn.com of 4,290 total summits, 572 were new summits, including 70 for the change in prominence from P500ft to P150m (492 ft). This data was purchased, analyzed, and included in the 2016 ARM update.

Summits on the Air – ARM for USA W6

2.2 Region Reference—Coastal Ranges (W6/CC-xxx)

Association	USA W6
Region	Coastal Ranges (W6/CC-xxx)
Region Manager	Hal Rounds, N6JZT (hrounds@yahoo.com)

2.2.1 Regional Notes

This region was created when the W6 Association was established and is based on physiographic provinces. Included are the summits of the Diablo Range, the Santa Cruz Mountains, the Santa Ynez Mountains, the westernmost Santa Monica Mountains, the westernmost portion of the Peninsular Ranges and the Channel Islands.

Most public land at or near the coastline is owned and managed by the State. That which is publicly accessible is typically within state parks. A large portion of the central coastal range is within the Los Padres National Forest.

Catalina Island is privately owned, and hiking permits are needed to access its summits.

2.2.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County

Summits on the Air – ARM for USA W6

2.3 Region Reference—Desert Ranges (W6/CD-xxx)

Association	USA W6
Region	Desert Ranges (W6/CD-xxx)
Region Manager	Refer to Association Manager

2.3.1 Regional Notes

This region was created when the association was established and is based on physiographic provinces. Included are summits of the various ranges within the Colorado, Mojave and Great Basin deserts and the inland portions of the Peninsular Ranges.

Large portions of land in this region are used and controlled by the US military. Access in these areas is strictly prohibited and nearby radio operations may be closely scrutinized. Do not cross any fences in this region.

Summits of the Inyo and White Mountains are within Inyo National Forest. Summits of the Panamint Mountains are within Death Valley National Monument. Several minor mountain groups are within the Mojave Desert National Preserve, administered by the National Park Service. The inland peninsular ranges contain Anza Borrego State Park and have spotty access through BLM lands. Several summits are located within Joshua Tree National Park, a destination for climbers worldwide.

Summits on the Air – ARM for USA W6

2.5 Region Reference—Transverse Ranges (W6/CT-xxx)

Association	USA W6
Region	Transverse Ranges (W6/CT-xxx)
Region Manager	Tim Goodrich, K6TW (k6tw@arrrl.net)

2.5.1 Regional Notes

This region was created when the association was established and is based on physiographic provinces. Included are the summits of the Tehachapi, Santa Susana, Santa Monica, San Gabriel, San Bernardino, Santa Ana San Jacinto and San Emigdio mountain ranges.

Most mountainous terrain is within the Angeles, San Bernardino and Cleveland National Forests. Summits of the Santa Monica Mountains are within the Santa Monica Mountain National Recreation Area, managed by the National Forest Service. Most open access routes to the Tehachapi range are through B LM lands.

2.5.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)

Summits on the Air – ARM for USA W6

2.6 Region Reference—Central Valley (W6/CV-xxx)

Association	USAW6
Region	Central Valley (W6/CV-xxx)
Region Manager	Alex Garcia, KK6ZLY (eagarcia1701@gmail.com)

2.6.1 Regional Notes

This region was created in version 2 of this document and includes summits of the Great Valley physiographic province (more commonly known as the California Central Valley). These summits are essentially “islands” that ascend from the otherwise flat valley.

2.6.2 Table of Summits

Summits on the Air – ARM for USA W6

2.8 Region Reference—Northern Coastal Ranges (W6/NC-xxx)

Association	USA W6
Region	Northern Coastal Ranges (W6/NC-xxx)
Region Manager	Brian Boschma, N6IZ (brianb@brianboschma.com)

2.8.1 Regional Notes

This region was created in version 2 of this document and overlays the northern portion of the Coastal Ranges region. Its southern border with Southern Coastal Ranges (W6/SC) is formed (west to east) by SR 129, north on US 101 to SR 152, then east along SR 152 to the Central Valley.

2.8.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)

Summits on the Air – ARM for USA W6

2.9 Region Reference—Northern Desert (W6/ND-xxx)

Association	USA W6
Region	Northern Desert (W6/ND-xxx)
Region Manager	Mike Herr, WA6ARA (wa6ara@gmail.com)

2.9.1 Regional Notes

This region was created in version 2 of this document and overlays the northern portion of the Desert Ranges region but excludes the White Mountains and Inyo Mountains. Its southern border with the Southern Desert region (W6/SD) is formed by Interstate 15.

2.9.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)	
W6/ND-001	Mount Patterson	3558	11673	38.4367	-119.3053	1/8/2012	31/12/2099	10	1272	Mono

Summits on the Air – ARM for USA W6

2.10 Region Reference—Northeastern Ranges (W6/NE-xxx)

Association	USA W6
Region	Northeastern Ranges (W6/NE-xxx)
Region Manager	Ron Adams, W6PZA (radams.shasta@gmail.com)

2.10.1 Regional Notes

This region was created in version 2 of this document and overlays the eastern portion of the Northern Ranges region. Its western border with the Northwestern Ranges region (W6/NW) is formed by Interstate 5.

2.10.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)	
W6/NE-001	Eagle Peak	3018	9900	41.2852	-120.1999	1/8/2012	31/12/2099	8	1332	Modoc
W6/NE-002	Warren Peak	2960	9710	41.3785	-120.2200	1/8/2012	31/12/2099	8	344	Modoc

Summits on the Air – ARM for USA W6

2.11 Region Reference—Northern Sierra (W6/NS-xxx)

Association	USA W6
Region	Northern Sierra (W6/NS-xxx)
Region Manager	Jordan Heichman, WC6J (wc6j@jordan-h.com)

2.11.1 Regional Notes

This region was created in version 2 of this document and overlays the northern portion of the Sierra Nevada region. Its southern border with the Southern Sierra region (W6/SS) is formed by SR 120 and its eastern border is US 395.

2.11.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)	
W6/NS-001	Excelsior Mountain	3794	12446	38.0244	-119.3052	1/8/2012	31/12/2099	10	386	Mono

Summits on the Air – ARM for USA W6

2.12 Region Reference—Northwestern Ranges (W6/NW-xxx)

Association	USA W6
Region	Northwestern Ranges (W6/NW-xxx)
Region Manager	Ron Adams, W6PZA (radams.shasta@gmail.com)

2.12.1 Regional Notes

This region was created in version 2 of this document and overlays the western portion of the Northern Ranges region. Its eastern border with the Northeastern Ranges region (W6/NE) is formed by Interstate 5.

2.12.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County
Number		(m)	(ft)			Start	Until		(ft)	
W6/NW-001	Thompson Peak	2741	8994	41.0006	-123.0484	1/8/2012	31/12/2099	8	1199	Trinity

Summits on the Air – ARM for USA W6

2.13 Region Reference—Southern Coastal Ranges (W6/SC-xxx)

Association	USA W6
Region	Southern Coastal Ranges (W6/SC-xxx)
Region Manager	Adam Kimmerly, K6ARK (tradmonkey@gmail.com)

2.13.1 Regional Notes

This region was created in version 2 of this document and overlays the southern portion of the Coastal Ranges region. Its northern border with Northern Coastal Ranges region (W6/NC) is formed (west to east) by SR 129, north on US 101 to SR 152, then east along SR 152 to the Central Valley.

2.13.2 Table of Summits

Ref	Summit Name	Height		Latitude	Longitude	Valid Dates		Pts	Prom	County

Summits on the Air – ARM for USA W6

2.14 Region Reference—Southern Desert (W6/SD-xxx)

Association	USA W6
Region	Southern Desert (W6/SD-xxx)
Region Manager	Jerry Hildeman, KG6HQD (kg6hqd@gmail.com)

2.14.1 Regional Notes

This region was created in version 2 of this document and overlays the southern portion of the Desert Ranges region. Its northern border with the Northern Desert region (W6/ND) is formed by Interstate 15.

2.14.2 Table of Summits

Summits on the Air – ARM for USA W6

2.15 Region Reference—Sierra Nevada (W6/SN-xxx)

Association	USA W6
Region	Sierra Nevada (W6/SN-xxx)
Region Manager	Jordon Heichman, WC6J (wc6j@jordan-h.com)

2.15.1 Regional Notes

This region was created when the association was established and is based on physiographic provinces. Included are the summits of the Sierra Nevada range and its foothills.

Most summits in this range are within the Sequoia, Sierra, Inyo, Stanislaus and Tahoe National Forests as well as Sequoia and Yosemite National Parks. Many of the more popular trailheads are world famous tourist destinations and can become quite crowded. Plans to climb Mt. Whitney should be made well in advance because permit numbers are limited and must be reserved during the heavy travel season from mid-July to mid-September. There are also permit quotas for Half Dome in Yosemite National Park and other areas. The more rugged trails and backcountry trails see little human activity.

Summits on the Air – ARM for USA W6

2.16 Region Reference—Southern Sierra (W6/SS-xxx)

Association	USA W6
Region	Southern Sierra (W6/SS-xxx)
Region Manager	Kevin Humrighouse, W6RIP (w6rip@outlook.com)

2.16.1 Regional Notes

This region was created in version 2 of this document and overlays the southern portion of the Sierra Nevada region. Its northern border with the Northern Sierra region (W6/NS) is formed by SR 120 and its eastern border is US 395.
